syn WIT, HUMOR, IRONY, SARCASM, SATIRE, REPARTÉE *shared meaning*
element: a mode of expression intended to arouse amused inter-
est or evoke attention and laughter or a quality of mind that pre-
disposes to such expression. WIT suggests the power to evoke
laughing attention by remarks showing verbal felicity or ingenuity
and swift perception, especially of the incongruous (true wit is
nature to advantage dressed, what oft was thought, but ne'er so
well expressed — Alexander Pope) HUMOR implies an ability to
perceive and effectively express the ludicrous, the comical, or the
absurd, especially in human life (the modern sense of humor is the
quiet enjoyment and implicit expression of the fun of things —
Louis Cazamian) IRONY applies to a manner of presentation in
which an intended meaning is subtly emphasized by appropriate
expression of its opposite (irony properly suggests the opposite of
what is explicitly stated, by means of peripheral clues — tone of
voice, accompanying gestures, stylistic exaggeration . . . thus, for

“Brutus is an honorable man” we understand “Brutus is a traitor”
— Jacob Brackman) SARCASM applies to savagely humorous ex-
pression, frequently in the form of irony, intended to cut and
wound (the arrows of sarcasm are barbed with contempt — Wash-
ington Gladden) SATIRE applies primarily to writing that holds up
vices or follies to ridicule and reprobation often by use of irony or
caricature (his dry wit and his easy, good-natured satire on the
follies of the day — Eleanor M. Sickels) REPARTÉE applies to the
power or art of responding quickly, smoothly, pointedly, and
wittily or to an interchange of such response (as for repartee . . .
as it is the very soul of conversation, so it is the greatest grace of
comedy — John Dryden)

Punctuation

The English writing system uses punctuation marks to separate groups of words for meaning and emphasis; to convey an idea of the variations of pitch, volume, pauses, and intonations of speech; and to help avoid contextual ambiguity. English punctuation marks, together with general rules and bracketed examples of their use, follow.

Apostrophe ’

⟨It is anyone’s guess how much it will cost.⟩
⟨Rodgers and Hammerstein’s musicals⟩ |
| 2. marks omissions in contracted words | ⟨didn’t⟩ ⟨o’clock⟩ |
| 3. often forms plurals of letters, figures, and words referred to as words | ⟨You should dot your <i>i</i> ’s and cross your <i>t</i> ’s.⟩
⟨His <i>l</i> ’s and his <i>7</i> ’s looked alike.⟩
⟨She has trouble pronouncing her <i>the</i> ’s.⟩ |

Footnotes

Footnotes to a text are indicated by Arabic superscript numerals placed immediately after the material to be footnoted, with no intervening space. The numbering may be consecutive throughout a paper, article, or book. If the reference is brief, it may be inserted within parentheses in the text itself, but the first full reference to a work should appear in a note. The footnotes may appear at the end of the complete text, at the end of each chapter, or at the bottom of each page. The samples shown below exemplify only the basic types of footnotes. For more detailed information, the *MLA Style Sheet* may be consulted.

Forms of Address

Since the relationship between correspondents affects the form of address used in letters, no rigid guidelines can be set down for all occasions. The following generally accepted forms, alphabetically listed in six categories, have been selected as those most likely to be encountered by the average person. When two salutations are shown, it is to be understood that the formal styling precedes the informal. In very formal salutations where the addressee is a woman, it is to be understood that in formal address “Madam” may be substituted for “Sir,” and in informal address “Mrs.” or “Miss” or “Ms.” may be substituted for “Mr.”

Attention Mr. John Doe
Gentlemen

SUBJECT: BLOCK LETTER

This is a facsimile of the Block Letter, whose structural parts are flush left. It may feature either the open or the mixed punctuation pattern: The open pattern is shown here.

The date line is typed two to six lines below the last letterhead line. Here, it is placed three lines below the letterhead. Account or policy numbers if required are single-spaced and blocked either above or below the date line.

Placement of the inside address varies by letter length. Here, it is typed four lines below the date line. If window envelopes are used, the all-capitalized, unpunctuated Postal Service state abbreviations should be employed. One space intervenes between the state abbreviation and the ZIP Code. If regular envelopes are to be used, state names may be typed out in full or abbreviated, depending on organization preference. An attention line if required is typed two lines below the last inside-address line.

The salutation is typed two lines below the attention line, or two to four lines below the last inside-address line. The salutation is "Gentlemen" if the letter is addressed to an organization, even if there is an attention line directing the letter to a particular individual within that organization. If the letter is addressed to an individual whose name is on line 1 of the inside address, the salutation is "Dear Mr. (or Ms. or Mrs. or Miss) + surname" or "Dear + first name" depending on the writer/reader relationship. A subject line, typically all in capitals, may be typed two lines below the salutation. The subject line is optional.

The first message line is typed two lines below the salutation, or two lines below the subject line if there is one. The message is

single-spaced internally and double-spaced between paragraphs. At least three message lines must be carried over to a continuation sheet: At no time should the complimentary close and the signature block stand alone. The last word on a sheet should not be divided. The continuation-sheet heading is typed six lines from the top edge of the page. Account or policy numbers if used on the first sheet must be included in the continuation-sheet headings. The message begins four lines below the last line of the heading.

The complimentary close is typed two lines below the last message line, followed by at least four blank lines for the written signature, followed by the writer's name in capitals and lowercase. The writer's business title and/or name of his department may be included in the typed signature block, if they do not appear in the printed letterhead.

Identification initials may comprise only the typist's initials if the same person dictated and signed the letter. These initials are typed two lines below the last signature-block line. The enclosure notation if used is typed one line below the identification line. The carbon copy notation if needed is placed one or two lines below any other notations, depending on available space.

Sincerely yours

Mr. John Z. Taller
Treasurer
XYZ Corporation

Dear Mr. Taller:

This is a facsimile of the Modified Block Letter. It differs from the Block Letter chiefly in the page placement of its date line, its complimentary close, and its signature block that are aligned at center, toward the right margin, or at the right margin. Either the open or the mixed punctuation pattern may be used: The mixed pattern is illustrated here.

While the date line may be positioned from two to six lines below the last line of the letterhead, its standard position is three lines below the letterhead, as shown above. In this facsimile, the date line is typed five spaces to the right of dead-center. If an account or policy number is required, it is blocked and single-spaced on a line above or below the date.

Special mailing notations and on-arrival notations such as the two shown above are all-capitalized, aligned flush left, and blocked together two lines above the first line of the inside address. If used singly, either of these notations appears two lines above the inside address.

The first line of the inside address is typed about four lines below the date line. This spacinuation can be expanded or contracted according to the letter length. The inside address, the salutation, and all paragraphs of the message are aligned flush left. The salutation, typed two to four lines below the last line of the inside address, is worded as it would be in the Block Letter. A subject line if used is typed two lines below the salutation in all-capital letters and is either blocked flush left or centered on the page. Underscoring the subject line is also acceptable, but in this case, only the first letter of each word would be capitalized.

The message begins two lines below the salutation or the subject line if there is one. Paragraphs are single-spaced internally and

Mr. Taller

- 2 -

double-spaced between each other; however, in very short letters, the paragraphs may be double-spaced internally and triple-spaced between each other.

Continuation sheets should contain at least three message lines. The last word on a sheet should not be divided. The continuation-sheet heading may be blocked flush left as in the Block Letter or it may be laid out across the top of the page as shown above. This heading begins six lines from the top edge of the page, and the message is continued four lines beneath it.

The complimentary close is typed two lines below the last line of the message. While the complimentary close may be aligned under some portion of the letterhead, directly under the date line, or even flush with but not overrunning the right margin, it is often typed five spaces to the right of dead-center as shown here.

The signature line is typed in capitals and lowercase at least four lines below the complimentary close. The writer's business title and department name may be included if they do not already appear in the printed letterhead. All elements of the signature block must be aligned with each other and with the complimentary close.

Identification initials need include only those of the typist, providing that the writer and the signer are the same person. These initials appear two lines below the last line of the signature block. An enclosure notation is typed one line below the identification line, and the carbon copy notation if required appears one or two lines below any other notations, depending on space available.

Very truly yours,
